GENDER AUDIT

Objectives of Gender Audit

- To promote gender equity throughout the campus.
- To provide equal opportunities for all genders within the institution.
- To investigate gender disparities at the college level.
- To identify areas and factors contributing to gender discrimination.
- To address gender-based issues affecting students, faculty, and administrative staff.
- To ensure balanced gender representation in decision-making processes across all college activities.

Gender Audit Concept and Methodology

Gender Audit is an organizational assessment process and a tool for action planning from a gender perspective. It critically evaluates the institution's capacity to provide a 'safe and secure' environment for female students, faculty, and administrative staff. The institution conducts a gender audit annually to raise awareness about respecting all genders and to address issues to enhance the safety and security of female students on campus.

To achieve gender equity, it is essential that women and girls have access to a diverse range of activities and programs that align with their needs and life experiences. The college consistently focuses on the holistic development of students' personalities and their quality achievements. A Gender Sensitization Cell has been established at the college, tasked with promoting gender equity awareness across the campus.
